LISTING OF THE CLAIMS

Pursuant to 37 C.F.R. §1.121, provided below is a listing of the pending claims.

Claims 1-70.   (Cancelled)

71.   (Currently Amended) A wireless system coupled to a messaging host and to a wireless data network that provides an interface for one or more data items associated with a user's computer between the messaging host and the wireless data network, the wireless system comprising:

a redirector component ~~means~~ configured to interface ~~for detecting the one or more data items using an automatically generated notification, the redirector means interfacing~~ with the messaging host via a wide-area packet network, wherein the one or more data items are received at the messaging host and have a first address identifying a mailbox that is viewable at ~~associated with~~ the user's computer, [[and]] the redirector component for causing the one or more data items to be packaged with an envelope having a second address to provide one or more packaged data items, the

2

second address being associated with a mobile data communication device, and further wherein the redirector ~~means includes logic for removing~~ component is configured to remove an outer envelope of a data item repackaged at the mobile data communication device and received therefrom for facilitating redirection of the received data item to a recipient; and

wireless gateway means for interfacing the one or more packaged data items to the wireless data network.

72. (Previously Presented) The wireless system of claim 71, wherein the one or more data items interfaced to the wireless data network are original data items.

73. (Previously Presented) The wireless system of claim 72, wherein the one or more data items are encrypted data items.

74. (Previously Presented) The wireless system of claim 72, wherein the one or more data items are compressed data items.

75. (Previously Presented) The wireless system of claim 72, wherein the one or more data items are repackaged using Multipurpose Internet Mail Extensions (MIME) standard.

76. (Previously Presented) The wireless system of claim 72, wherein the one or more data items are repackaged using Internet Message Access Protocol (IMAP).

77. (Previously Presented) The wireless system of claim 71, wherein the one or more data items interfaced to the wireless data network are copies of the data items.

78. (Previously Presented) The wireless system of claim 77, wherein the one or more data items are encrypted data items.

79. (Previously Presented) The wireless system of claim 77, wherein the one or more data items are compressed data items.

4

80.   (Previously Presented) The wireless system of claim 77, wherein the data items are repackaged using Multipurpose Internet Mail Extensions (MIME) standard.

81.   (Previously Presented) The wireless system of claim 77, wherein the data items are repackaged using Internet Message Access Protocol (IMAP).

Claims 82-94.   (Cancelled)

95. (Currently Amended) A method for interfacing one or more data items associated with a user's computer, the method comprising:

receiving ~~detecting~~ one or more data items from a messaging host for a user, wherein the one or more data items were received at the messaging host over a wide-area packet network and have a first address identifying a mailbox that is viewable at the user's computer; ~~using an automatically generated notification, wherein the one or more data items are received at a messaging host over a wide-area packet network and have a first address associated with the user's computer;~~

causing the one or more data items to be packaged with an envelope having a second address to provide one or more packaged data items that address a mobile data communication device associated with the user; and

causing the one or more packaged data items to be sent to the mobile data communication device using the second address.~~; and~~

~~removing an outer envelope of a data item repackaged at the mobile device and received therefrom for facilitating redirection of the received data item to a recipient.~~

Claims 96-106. (Cancelled)

107. (New) The method of claim 95, further comprising encoding the one or more data items prior to being sent to the mobile data communication device.

108. (New) The method of claim 95, further comprising encrypting the one or more data items prior to being sent to the mobile data communication device.

109. (New) The method of claim 95, further comprising using Multipurpose Internet Mail Extensions (MIME) for packaging the one or more data items.

110. (New) The method of claim 95, wherein the one or more data items comprise email messages from senders, and the method further comprises configuring a preferred list of senders whose messages are to be sent to the user's mobile data communication device.
